## To whom it may concern

Chris Sands of Accurate Pest Management

As an Interior designer I am closely associated with the construction industry, and am asked regularly if I can recommend a company for pest control.

After using Chris Sands and Accurate Pest Management on several occasions, I can proudly say that THALASSA will always call on Chris for minor or major works that are required by my clients.

I had a call from a client saying that she had been to Melbourne for a weekend with her mother and sisters, only to return with an infestation of bed bugs which were in the hotel that she had stayed in. My client was devastated and wanted me to recommend a company that could take control of the situation and take all of the worry out of her hands.

From the moment of contact with Chris, his knowledge of these nasty little critters, organisational skills and professional manner with my client was tremendous.

My client had called 2 other pest control companies prior to calling me for advice, and both times had been told it was too hard and they were not interested in helping.

I would highly recommend Chris Sands of Accurate pest Management to any prospective client seeking pest control services and on-going support with a company that is up to date with the latest processes in the pest control industry.

Please do not hesitate to contact me on 0755 202 825 should you wish to discuss this further.

Kind Regards  
Samantha Hough  
Director / Lead designer
